SeekerXR

An Integrated Platform for Intelligence Gathering, Investigation and Analysis

Made By Investigators, For Investigators

Ex-government cyber veterans created SeekerXR to address cases more efficiently and with greater success.

Decades of experience in the field and hard- won expertise in intelligence collection and evidentiary standards formed the blueprint.

SeekerXR At-a-Glance

- Operations-ready out of the box.
- Easily search a multitude of Open Source Intelligence (OSINT) data feeds.
- Perform data and network analysis without cracking a manual.
- State-of-the-art data fusion and machine learning capabilities.
- Report findings clearly and concisely with a cutting edge visualisation engine.

A One-Stop Intelligence Shop

Legally, transparently, and ethically aggregates data from over 50 OSINT sources. Tap language-agnostic, world-wide access to 80+ social media, land registries, cargo data, deep web/dark web, legally available closed data sets, and more.

A User-Friendly Environment

Gather and connect information at machine speed, make sense of it with human expertise. Analyse the backgrounds, networks, commercial interests, assets, and exposures of private individuals, corporations, and institutions.

A Report-Ready Visualisation Tool

Collaborate securely and seamlessly. Powerful layout and styling capabilities make it easy to present the story behind the data in court or to clients.

Technical Specifications

SeekerXR is a browser-based platform that can be deployed on-prem or online. SeekerXR is compatible with Google Chrome and runs on Windows, Mac OSX, and Linux operating systems.
